D2	212	Aantal sterfgevallen op leeftijd 0 jaar van de generatie n					

Cette table de mortalité a été revue et corrigée pour correspondre aux demandes des institutions internationales

(Eurostat, UNSD). Les changements principaux concernent :

- la série des âges révolus (x ; non reprise dans la table) qui va de 0 à «105+» et
- le calcul des probabilités de décès, à partir des taux de mortalité.

SOURCE : Statbel (Direction générale Statistique - Statistics Belgium).

Toutes les données nécessaires sont issues du Registre national des personnes physiques.

Cette table de mortalité a été revue et corrigée pour correspondre aux demandes des institutions internationales

(Eurostat, UNSD). Les changements principaux concernent :

- la série des âges révolus (x ; non reprise dans la table) qui va de 0 à «105+» et
- le calcul des probabilités de décès, à partir des taux de mortalité.
