Notas:

Las tasas de mortalidad y riesgos de muerte están expresados en tanto por mil.

La tasa de mortalidad, el promedio de años vividos el último año de vida, el riesgo de muerte, las defunciones teóricas y la población estacionaria de edad 100 están referidas al grupo de edad de 100 o más años.

El promedio de años vividos el último año de vida en el grupo de edad de 100 y más años corresponde al promedio de años vividos con 100 años cumplidos.

En Septiembre del 2017 se han corregido pequeños errores en la programación de las tablas de mortalidad, serie 1975-1990

y 1991-2015, que afectan: al Promedio de años vividos el último año de vida en la edad de cierre de la tabla, a la Población estacionaria a todas las edades, Tiempo por vivir a todas las edades y Esperanza de vida a todas las edades.

En esta última las diferencias se producen en el segundo y/o tercer decimal. Además, debido a las correcciones de las personas de 100 y más años en las Cifras de población a 01/01/2016, se han actualizado las tasas específicas de mortalidad del año 2015, afectando exclusivamente a la edad de cierre de la tabla.
