Notas:

1.- The mortality rates and risks of death are expressed in both per thousand.

The mortality rates, risks of death, theoretical deaths and the seasonal population aged x refer to age group $[x, x+5)$ where $5 \leq x < 95$, to group $[1, 5)$ where $x=1$ and to group 95 years old or more where $x=95$.

is the average of years lived in the last year of life in age group 95 years old or more corresponds to the average years lived aged 95 years old.

The last age group in the results for Ceuta y Melilla is that aged 90 years old and more.
