Note: 1995-2013 based on the retro-projection; starting from 2014 based on the registered data

mx - Death rate for the age interval (x, x+n)

qx - Probability of dying for an individual between age x and x+n

lx - Number of survivors at age (x) for 100000 births

dx - Number of deaths between ages x and x+n

Lx - Number of person-years lived between ages x and x+n

Tx - Person-years lived above age x

ex - Expectation of life (ex) at age x, i.e., average number of years lived subsequent to age x by those reaching age x
